You added extra conditions to the "Clean as You Code" quality gate, which is something we do not recommend. Learn why

Conditions

Add Condition

Conditions on New Code

Metric	Operator	Value	
Coverage	is less than	80.0%	
Duplicated Lines (%)	is greater than	3.0%	
Maintainability Rating	is worse than	A (Technical debt ratio is less than 5.0%)	
Reliability Rating	is worse than	A (No bugs)	
Security Hotspots Reviewed	is less than	100%	
Security Rating	is worse than	A (No vulnerabilities)	

Conditions on Overall Code

Metric	Operator	Value	
Bugs	is greater than	0	
Code Smells	is greater than	10	
Duplicated Lines (%)	is greater than	2.0%	
Line Coverage	is less than	95.0%	
Security Hotspots Reviewed	is less than	100%	
Technical Debt Ratio	is greater than	3.0%	

JUSTIFICACIÓN

Métrica	Condición Configurada	Justificación de la decisión
Bugs	is greater than 0	Se establece que el proyecto no debe contener errores conocidos. Si existe al menos un bug, el Quality Gate falla, garantizando que el código entregado tenga un comportamiento confiable y reduciendo el riesgo de fallos en producción.
Code Smells	is greater than 10	Se permite un máximo de 10 code smells, considerando que pequeñas oportunidades de mejora no afectan de manera crítica la funcionalidad. Este umbral promueve buenas prácticas de programación y evita que la deuda de mantenibilidad crezca excesivamente.
Duplicated Lines (%)	is greater than 2.0%	Limitar la duplicación de código al 2% fomenta la reutilización y evita mantener múltiples copias de una misma lógica, reduciendo errores al realizar cambios futuros y facilitando el mantenimiento del proyecto.
Line Coverage	is less than 95.0%	Se exige una cobertura mínima del 95% mediante pruebas automatizadas para asegurar que la mayor parte del código haya sido ejecutada y validada durante las pruebas, disminuyendo la probabilidad de defectos no detectados.
Security Hotspots Reviewed	is less than 100%	Se requiere que el 100% de los Security Hotspots hayan sido revisados. Esto garantiza que todas las posibles áreas de riesgo identificadas por SonarQube sean analizadas antes de aprobar el código, fortaleciendo la seguridad de la aplicación.
Technical Debt Ratio	is greater than 3.0%	Se limita la deuda técnica a un máximo del 3%, promoviendo un código limpio y mantenible. Un porcentaje bajo indica que el esfuerzo necesario para corregir problemas de calidad es reducido y que el proyecto puede evolucionar sin acumular costos elevados de mantenimiento.
